Gentle Skin®

classic

► The Classic Quality

- One of the most popular latex gloves in the market
- High percentage of latex for an improved protection
- Safe handling in the field of rescue and emergency medical aid
- Ideally suited for use in the industrial sector
- High extendibility
- Effective reduction of allergens, approved by tests

► Surface Refinement

- eliminates the powder, i. e., the "allergy transmitter"
- reduces the proportion of accelerators clearly and
- is the most effective method to reduce proteins.

The result is a **multi-hypoallergenic** glove.

► Safety

These gloves conform to the following European standards:

- Medical Device Directive 93/42/EWG
- Medical Device Directive according to the German and Austrian Law
- National regulations of the EU member states
- EN 455-1 (density), -2 (physical properties), -3 (biological evaluation)
- TRGS 540 (sensitizing substances)
- Recommendations of BGW and BUK
- Recommendations of leading allergologists and dermatologists

Advice: Our "Gentle Med Cremelotion W/O" is prophylactic protection and expedient complement to protective gloves.
