with aloe vera coating

Gentle Skin®

Aloecare™

We care about your health...

Our Gentle Skin® products provide maximum protection for your health.

High density combined with high tensile strength ensure the utmost protection against infections, guaranteed by regular quality controls exceeding the legal requirements.

Exemplary low allergen and protein values measured with the most exact methods available warrant minimum burden for your skin.

...and your skin

Wearing medical gloves during a long period of time coupled with the use of alcoholic hand disinfection strains your skin.

In order to counteract skin irritations, we have developed our unique Gentle Skin® Aloecare™ with special aloe vera formula.

The containing aloe vera inner coating moisturizes your skin during wearing, alleviates the typical itching and pruritus and eases the effect of rough and cracky skin.

Pure aloe vera gel contains more than 200 biological active agents, amongst others with anti-inflammatory, wound-healing, anti-arthritis and pain-alleviating characters.

Most advanced methods are applied to extract the plant's purest and biologically active quality. No pesticides or herbicides are used in the cultivation.

The International Aloe Science Council (IASC) supervise the quality. This certification guarantees the highest standards regarding product purity and 100 % positive natural aloe vera characteristics.

Gentle Skin® Aloecare™ is subject to viral density tests and conform to the Medical Device Directive 93/42/EWG (e. g. EN 455-1, -2 and -3)

Advice: Our "Gentle Med Cremelotion W/O" is prophylactic protection and expedient complement to protective gloves.

Size	REF	Box	Carton	Pallet
X-Small (XS = 5 – 5,5)	1231XS	100 pcs.	10 boxes	36 cartons
